

Overload relay, 120-142A, 1N/O+1N/C

Part no.

Article no.

Catalog No.

ZB150-150/KK 278472 XTOB150GC1S

# Delivery programme

| Product range             |                |   | Overload relay ZB up to 150 A  |
|---------------------------|----------------|---|--|
| Frame size                |                |   | ZB150  |
| Phase-failure sensitivity |                |   | IEC/EN 60947, VDE 0660 Part 102  |
| Description               |                |   | Test/off button<br>Reset pushbutton manual/auto<br>Trip-free release   |
| Mounting type             |                |   | Separate mounting  |
| ¢                         | I <sub>r</sub> | A | 120 - 150  |
| Contact sequence          |                |   | $\begin{bmatrix} 1 \\ -1 \\ 2 \\ 2 \\ 4 \\ 6 \\ 98 \\ 96 \end{bmatrix}$  |
| Auxiliary contacts        |                |   |  |
| N/O = Normally open       |                |   | 1 N/O  |
| N/C = Normally closed     |                |   | 1 N/C  |
| For use with              |                |   | DILM80, DILM95,<br>DILM115, DILM150,<br>DILM170<br>DIULM80, DIULM95,<br>DIULM115, DIULM150,<br>SDAINLM140,<br>SDAINLM165,<br>SDAINLM200,<br>SDAINLM260 |
| Short-circuit protection  |                |   |  |
| Type "1" coordination     | gG/gL          | A | 315  |
| Type "2" coordination     | gG/gL          | A | 250  |

#### Notes

Overload release: tripping class 10 A

Short-circuit protection: Observe the maximum permissible fuse of the contactor with direct device mounting.

Suitable for protection of Ex e-motors.

PTB 10 ATEX 3010

Observe manual MN03407005Z-DE/EN.

Notes Separate mounting

#### **Technical data** General

Notes

Notes Ambient air temperature: Operating range to IEC/EN 60947, PTB: -5°C to +55°C Rated operational current: Making and breaking conditions to DC-13, time constant as stated Main circuits terminal capacity solid and flexible conductors with ferrules: When using 2 conductors use equal cross-sections

6 mm flexible with ferrules to DIN 46228 Rated operational current DC-13, 60 V: N/O auxiliary contact 0.6 A

Design verification as per IEC/EN 61439

| Technical data for design verification   |                   |    |  |
|--|-------------------|----|--|
| Rated operational current for specified heat dissipation   | In                | А  | 150  |
| Heat dissipation per pole, current-dependent   | P <sub>vid</sub>  | W  | 8.5  |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub>  | W  | 25.5   |
| Static heat dissipation, non-current-dependent   | P <sub>vs</sub>   | W  | 0  |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.   |                   | °C | -25  |
| Operating ambient temperature max.   |                   | °C | 55   |
| IEC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts   |                   |    |  |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |

| 10.2.6 Mechanical impact                                 | Does not apply, since the entire switchgear needs to be evaluated.   |
|--|--|
| 10.2.7 Inscriptions                                      | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

### **Technical data ETIM 5.0**

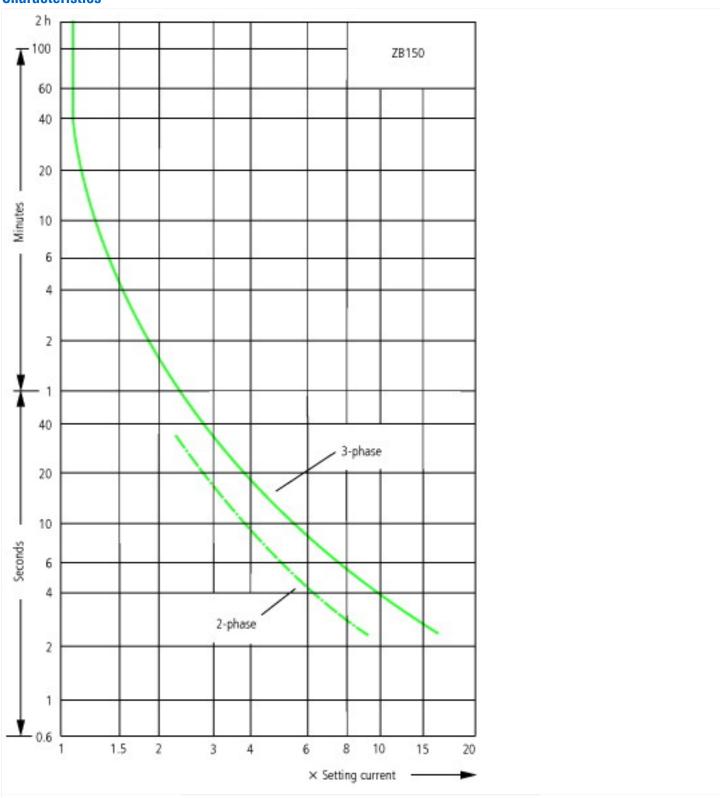

Low-voltage industrial components (EG000017) / Thermal overload relay (EC000106)

These tripping characteristics are mean values of the spread at 20 °C ambient temperature in a cold state. Tripping time depends on response current. On devices at operating temperature the tripping time of the overload relay drops to approx. 25 % of the read value. Specific characteristics for each individual setting range can be found in the manual.
